

COOKIE POLICY

What are cookies?

A cookie is a file that is downloaded to your computer when you access certain web pages. Cookies allow a website, among other things, to store and retrieve information about a user's browsing habits or their device and, depending on the information they contain and how your device is configured, they can be used to recognize an anonymous user.

Cookies are associated only with an anonymous user and their computer and do not provide any information that allows the user's personal data to be deduced.

Registered users who log in or have logged in will be able to benefit from more personalized services tailored to their profile, thanks to the combination of data stored in cookies with the personal data used during registration. These users expressly authorize the use of this information for the stated purpose, without prejudice to their right to reject or disable the use of cookies.

Types, Purpose, and Functioning of Cookies in General.

1. Types of Cookies According to Their Duration.

Depending on how long they remain active on the user's device, we can distinguish between:

Session Cookies: These are a type of cookie designed to collect and store data while the user is browsing a website. They are typically used to store information that is only needed to provide the service requested by the user on a single occasion (e.g., a list of purchased products).

Persistent Cookies: These are a type of cookie in which the data remains stored on the user's device and can be accessed and processed for a period defined by the cookie provider, which can range from a few minutes to several years.

2. Types of Cookies According to the Entity That Manages Them.

Depending on the entity that manages the equipment or domain from which the cookies are sent and processes the data obtained, we can distinguish between:

First-party cookies: These are sent to the user's terminal equipment from a computer or domain managed by the publisher itself, from which the service requested by the user is provided.

Third-party cookies: These are sent to the user's terminal equipment from a computer or domain that is not managed by the publisher, but by another entity that processes the data obtained through the cookies.

3. Types of Cookies According to Their Purpose.

Depending on the purpose for which the data obtained through cookies is processed, we can distinguish between:

Technical Cookies: These are cookies that allow the user to navigate through a website, platform, or application and use the different options or services available, such as controlling data traffic and communication, identifying the session, accessing restricted areas, remembering the items in an order, processing an order, registering for or participating in an event, using security features while browsing, storing content for video or audio playback, or sharing content through social networks.

Personalization cookies: These cookies allow the user to access the service with certain predefined general characteristics based on a series of criteria on the user's device, such as language, browser type, and regional settings.

Analytics cookies: These cookies allow the party responsible for them to track and analyze user behavior on the websites to which they are linked. The information collected through these cookies is used to measure website, application, or platform activity and to create user browsing profiles in order to introduce improvements based on the analysis of user data.

Advertising cookies: These cookies allow for the most efficient management of advertising spaces that the publisher may have included on a website, application, or platform from which the requested service is provided, based on criteria such as the content displayed or the frequency with which ads are shown.

Behavioral advertising cookies: These cookies allow for the most efficient management of advertising spaces that the publisher may have included on a website, application, or platform from which the requested service is provided. These cookies store information about user behavior obtained through continuous observation of browsing habits, which allows for the development of a specific profile to display advertising based on that profile.

Consent and Authorization for the Use of Cookies

When you access this website for the first time, you will see a space or banner informing you about the use of cookies and where you can consult this cookie policy via a link. If you consent to the use of cookies, continue browsing by using the scroll bar or clicking on a link (accept) as appropriate, it will be understood that you have consented to our cookie policy and, therefore, to the installation of cookies on your computer or device, unless you have modified your browser settings to reject their use.

What types of cookies does this website use?

Definition, Identification, and Purpose of the Cookies on this Website Not Exempt by the LSSI (Law on Information Society Services and Electronic Commerce). These would be:

Analytics Cookies: These are cookies that, whether processed by us or by third parties, allow us to quantify the number of users and thus perform statistical measurement and analysis of how users use the offered service. For this purpose, your browsing on our website is analyzed in order to improve the products or services we offer you.

Advertising Cookies: These are cookies that, whether processed by us or by third parties, allow us to manage the advertising space on the website as effectively as possible, adapting the ad content to the content of the requested service or to your use of our website. For this purpose, we may analyze your internet browsing habits and show you advertising related to your browsing profile.

Cookie Identification Table and Purpose.

Publisher Name, Cookie Name, "Type," and Purpose.

Cookie	Tipo	Nombre	Proposito	Más información
_FBP	OWN	IBEROCAMPER.COM	MEASURES PAGE VISITS PERFORMANCE	
BACKGROUNDPANEL	OWN	BOOKING.IBEROCAMPER.COM	IT IS USED TO DISPLAY A PANEL OR A BACKGROUND IMAGE ON A WEBSITE OR A
